

Finland Experience in Education

Innovation Pedagogy, a new approach to learning, developed at Turku University of Applied Sciences in Finland

Innopeda® is the answer for the educational sector to meet the challenges of the changing world. The old learning formulas are not adequate anymore.

The core of Innovation pedagogy is to emphasize interactive dialogue between different actors within the educational organization and students as well as the surrounding working life and society. Working life orientation, flexible curricula and multidisciplinary learning environments are essential requirements for innovation pedagogy to succeed.

Entrepreneurship and entrepreneurial attitude are encouraged, and internationalization is embedded into studies in versatile ways. The assessment is development-oriented, i.e. students can assess their own and peers' competences and know how to develop them.

Innovation Pedagogy emphasizes the viewpoints of RDI and working life, making our graduates independently minded professionals with excellent international and communication skills.

Innopeda is based on experimenting, sharing know-how and combining different approaches.

With Innopeda we successfully connect teaching, research and development activities, internationality, and cooperation with working life.

Course Content

The objective of the Finland Experience in Education is firstly to connect with Scandinavian educational atmosphere as well as to give an overview of the Finnish Education in different sectors. Furthermore, you will learn about the innovation pedagogy framework, participate in workshops and discussions. In addition, the experience familiarizes participants with new active ways of teaching and learning.

This intensive training includes access to TUAS learning environments, interactive sessions and gives participants the Innopeda® in Education certificate.

Get acquainted with the high-level of the Finnish education and Pisa results!

Contents:

• Working towards the sustainable future theme • Introduction to Finland, its Educational System, and TUAS • Innovation Pedagogy Framework: main principles • New Learning Culture and Renewing teacher roles • Innovation Pedagogy in Action • Feedback and interactive discussions • 2 school visits in the city of Turku

SiQA Quality Assurance

The certification follows the Standards and Guidelines for Innopeda. Adopted from the Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG). (2015). Brussels, Belgium.

The SiQA is a tool for educational organizations to continuously evaluate and develop their requirements for teaching and learning according to Innopeda. The SiQA form a set of standards and guidelines for internal and external quality assurance in education. The SiQA provide guidance, covering the areas which are vital for successful quality provision and development of the learning environments in education.

Turku University of Applied Sciences - TUAS

TUAS is an inspiring community of 10,000 members – an innovative and multidisciplinary higher education institution, which creates international competitiveness and well-being for Southwest Finland. Our graduates are practice-oriented professionals with top competencies.

Studies at TUAS are working life oriented, combining theoretical studies with professional skills. We also provide high quality and flexible training and consulting services for both individuals and organizations in the public and private sector. TUAS coordinates or acts as a partner in over 200 RDI projects yearly.
