

Development Process

Making the Change

Innovation Pedagogy, a new approach to learning, developed at Turku University of Applied Sciences in Finland

Innopeda® is the answer for the educational sector to meet the challenges of the changing world. The old learning formulas are not adequate anymore.

The core of Innovation pedagogy is to emphasize interactive dialogue between different actors within the educational organization and students as well as the surrounding working life and society. Working life orientation, flexible curricula and multidisciplinary learning environments are essential requirements for innovation pedagogy to succeed.

Entrepreneurship and entrepreneurial attitude are encouraged, and internationalization is embedded into studies in versatile ways. The assessment is development-oriented, i.e. students can assess their own and peers' competences and know how to develop them.

Innovation Pedagogy emphasizes the viewpoints of RDI and working life, making our graduates independently minded professionals with excellent international and communication skills.

Innopeda is based on experimenting, sharing know-how and combining different approaches.

With Innopeda we successfully connect teaching, research and development activities, internationality, and cooperation with working life.

Course Content

The objective of this training is to guide participants through a holistic development process to implement Innovation Pedagogy in their education institution. The Intensive Training is included in development process as well as the implementation and monitoring of the change. It may include staff exchange, site visits, process consulting and coaching.

Content and follow up during the process:

• Experiencing the authentic Finnish educational culture in Finland • **Creating a roadmap for development – Analysis of current situation** • Making the change – Conducting a personalized development plan at your institution according to Innovation Pedagogy • **Training in Finland and on client's premises** • Adopting Innopeda as a pedagogical strategy • **Working towards the sustainable future** • Activating methods for making the change with Innovation Pedagogy

SiQA Quality Assurance

The certification follows the Standards and Guidelines for Innopeda. Adopted from the Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG). (2015). Brussels, Belgium.

The SiQA is a tool for educational organizations to continuously evaluate and develop their requirements for teaching and learning according to Innopeda. The SiQA form a set of standards and guidelines for internal and external quality assurance in education. The SiQA provide guidance, covering the areas which are vital for successful quality provision and development of the learning environments in education.

Turku University of Applied Sciences - TUAS

TUAS is an inspiring community of 10,000 members – an innovative and multidisciplinary higher education institution, which creates international competitiveness and well-being for Southwest Finland. Our graduates are practice-oriented professionals with top competencies.

Studies at TUAS are working life oriented, combining theoretical studies with professional skills. We also provide high quality and flexible training and consulting services for both individuals and organizations in the public and private sector. TUAS coordinates or acts as a partner in over 200 RDI projects yearly.
