Get acquainted with the high level of the Finnish education and Innovation Pedagogy by Turku UAS

“Innopeda® Educational Visit” aims to connect visitors to the Nordic educational atmosphere and give the participants an overview of the Finnish education in different educational sectors and levels.

The participants will learn about the innovation pedagogy framework developed by Turku University of Applied Sciences (Turku UAS) and participate in workshops and discussions led by the University experts.

The experience will familiarize participants with new and active ways of teaching and learning.

The programme

The programme covers the background of the Finnish welfare society and education, changes in future education and the pedagogical mindset.

It will dive into innovation pedagogy as a strategy, including the innovation competencies, learning environments onsite/online and the change needed in educational management aiming at a sustainable future.

EduCity Campus

The training will take place in the new “EduCity” campus of Turku UAS.

In addition, the programme includes two (2) site visits to schools/institutions, according to the preference and needs of the customer.

As a result, the participants are expected to have a better understanding of the Finnish educational culture, new learning environments, innovation pedagogy, and the Nordic lifestyle. Innopeda® Educational Visit is a step ahead to becoming a certified Innopeda teacher or a manager (see the descriptions of these entities separately).
